

ENGINEERED FOR

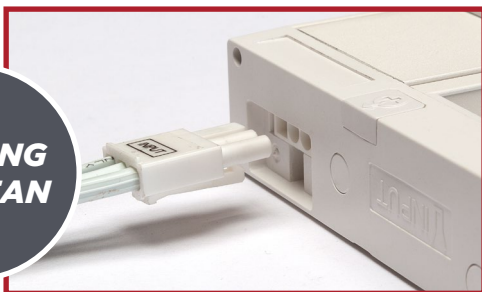

EASE OF INSTALLATION

WIRING MADE EASY

Included quick connector and ample internal wiring space for ease of installation. Optional under cabinet junction boxes offer even greater flexibility for retrofit applications or installations in tight areas. Use the cord and plug accessory when direct wiring isn't an option or if you want a simple update without a complete remodel.

KEEPING IT CLEAN

One power source is all that's needed for most applications, making for a clean installation. Optional extension cables in various lengths interconnect fixtures across large areas, around corners and between cabinets, eliminating the need for additional wiring to the power source or outlet.

GOING TO NEW LENGTHS

The included end-to-end wire connector allows you to mix and match various sizes and to configure customized lengths for any under cabinet installation.

ACCESSORIES FOR

MORE WAYS TO CONNECT

GO TO NEW LENGTHS WITH EXTENSION CABLES

Configure up to 22 of the 28" fixtures and up to 96 of the 8" fixtures. Custom installations are possible by mixing different lengths using a combination of link cables, junction boxes and end-to-end connectors.
