

TRANSFORMER & DIMMER COMPATIBILITY GUIDE

Important Notice: Transformer testing is performed using a specific manufacturing date code. Transformers with the same model number but different production dates may have different electronic designs, which can affect compatibility. Likewise, newer transformers with the same model number may have design revisions that impact performance. Compatibility may also extend beyond this list. SATCO recommends testing a small number of downlights — even when the transformer appears on the compatibility list—to confirm proper compatibility and performance. This document is provided for informational purposes only and should be considered a recommendation. Every effort has been made to achieve the best possible results; however, these results were generated under laboratory conditions and may contain inaccuracies or limitations. All data subject to change without notice.
